

SKILLS

- **Production management**
- **Quality Management**
- **Industrialization**
- **Check**

Saverio Puglia graduated from the Polytechnic University of Turin in 2023 with a degree in Automotive Engineering. He conducted his experimental thesis at the Fiat Powertrain Technologies Industrial plant in Turin. His thesis focused on the effects of continuous improvement techniques on Life Cycle Assessment.

In 2024, he became a licensed professional engineer and registered with the Order of Engineers of the Province of Turin.

His academic and professional path is focused on environmental sustainability. During his academic years, he dedicated himself to research within the H2politO Team of the University, focusing on Powertrain with an emphasis on fuel consumption reduction and the use of alternative fuels.

In 2021, he held the role of Internal Combustion Engine Division Manager, coordinating 11 team members for the development of a new engine dedicated to bioethanol fuel for light applications.

In 2022, he joined IVECO GROUP as a process technologist at the E-Pwt plant, overseeing production ramp-up and continuous improvement. Subsequently, in 2023, he worked in Manufacturing Quality, ensuring quality outputs by coordinating 7 industrial workers and successfully leading the customer approval process and the industrialization of production control and traceability systems.

Since 2021, he has also been a technical commissioner for ACI Sport.

Since 2024, he has been with D&P in the role of Industrial Process Analyst.
